# THIS IS A CYBERFIRST WORLD

EXPLORE IT

In a rapidly evolving online world, it is imperative that cyber security is a pillar of young people's education so that they can access the careers of the future and stay safe online.

To help ensure the UK has a sustainable supply of diverse and high-quality individuals joining the cyber workforce in the future, the UK Government strives to equip young people with the digital awareness and skills they will need to enable them to pursue a career path in the sector.
